## Goldeneye: 00 Heaven :: Recreating Goldeneye64

Posted by Wake - 2007/10/18 23:19

---

Hello CrysisEU!

Im wake, project manager/music/classic maps for this remake. Yes GES on HL2 is already one alternative for GE fans, however this mod is going to be doing SP as focused and MP as by-product like the original ; and on Crytek which will make all the outdoor maps absolutely amazing!

::Aim::

To recreate the SP missions and MP elements of GE64, the game originally made by Rare on Nintendo64. This mod will be a totally free base creation as its dealing in copyright properties, however all of the physical material is to be completely made from scratch by the team.

.....

We are on the lookout for more developers to come on, we have a handful including mappers, sound composition and Animation. However we need some 3D modelers for characters/weapons/props and more coders and animators to handle our Single player goals.

I encourage people interested in having their say to either sign to our Forums, or come back here after just viewing the Site and give their views ; or both!

This team is more than willing to give interviews with site admins here when our progress is in full swing. We plan to release patches as each missions. For instance ; First release will plan to be :

- Dam SP
- Dam,Library MP
- 4 Characters
- Few weapons

And ongoing like this in release structure.

Thanks and hope to see some interest:)

I dont think much like that, but im not sure i never played NF.

This is a recreation of a console game from 1997 on nintendo. First best FPS in a lot of gamers minds and hearts.;
