
Crysis Dreamscenes for Windows Vista

Posted by XxR3zD3ViLxX - 2008/01/30 14:26

For the fans who've always wanted Crysis as a Dreamscene which is a background automatic looping video; well, Crymod has compiled a collection of "Crysis Dreamscenes" for Windows Vista Ultimate Users.

Here's the post that explains the whole thing if some aren't familiar with Dreamscene:

About Dreamscenes

Dreamscenes are an addon for Windows Vista Ultimate. With this addon installed, you can put videos on your desktop to replace those old and static desktop wallpapers. This uses more CPU power but its nice to watch and its definitely worth a try. In order to use those dreamscenes on your Vista system, you have to download and install the Windows Dreamscene extra, which can be found on Windows Update page. You will also have to download and install the free program DeskScapes by StarDock.

Our forum member Mephisto03 recently has found a total number of five Crysis related Dreamscenes for everyone to download. We have taken screenshots of some of the dreamscenes in action for you to look at:
